

SHENANDOAH ASTRONOMICAL SOCIETY

February 2011

SAS Meeting February 14 Lord Fairfax Community College 7:00 P. M. in the Board Room

We are in the Board Room again for this semester. Alan may bring a presentation this time, otherwise we will show one of the episodes from the Universe Series on astronomy. And I will bring along a NASA video just in case so come on out, we will have something interesting on astronomy.

Betty in Hawaii

Last month Betty recounted her experiences going to Hawaii as a member of a group selected to study astrobiology. She also had several photos of interesting views taken on that trip. I used two of them in the

newsletter last month. This time I am using the others. If anyone did not see the article, it is in the January newsletter available both on the web site and on the Yahoo Shenastro group.
